PROJECTS

- **Pizza Order Collection GUI Application (Java Swing):**
Developed a Java Swing–based desktop application using a modular multi-panel architecture, with each panel implemented as a separate class to ensure clean separation of concerns. Implemented a dynamically displayed black-themed JTextArea, which appears on user interaction via Show / Show Less controls to present formatted order summaries. Applied event-driven programming, object-oriented design, and CSV-based file handling to improve usability and maintainability

- Employee Registration GUI Application (Java Swing):**
 Designed a desktop GUI for employee registration using Java Swing with dynamic Key Listener validation and modular UI switching through a single visibility Reset method. Reduced redundant UI code by ~80%, enhancing maintainability and interface efficiency.
- Customer Entry & Management System (Java Swing):** Developed a Java Swing-based customer management system with CSV file persistence and secure password masking features. Improved data retrieval speed by ~50% through optimized file handling and streamlined user interaction.
- Loan EMI & Amortization Web App:**
 Built a client-side web application for EMI calculation and amortization schedule generation using JavaScript, dynamic DOM manipulation, and structured HTML/CSS layouts.
